**ROSES in Your Garden Give Beauty and Hope in These Hectic Days**

# WYANT ROSES *produce satisfaction*

WYANT ROSES are of the highest quality and are all two-year field-grown budded bushes. Having been raised in the severe climate of Northern Ohio by Rose Specialists, they will produce satisfaction in your garden if given a chance.

---

## PLANTING INSTRUCTIONS

Keep the roots moist all the time before planting.

Spread out the roots so they do not crowd, and tramp the earth firmly about them.

Don't plant too deep.

Plant in good soil where there is sunshine at least half a day.

Mound soil 6 to 10 inches *immediately* after planting, to keep the moisture in the branches.

Roses banked with earth immediately after planting.

## *Fall-Planted Roses are Best*

Leading rosarians now agree that fall is the ideal time to plant Roses. Wintering in the ground is Nature's way and results in earlier and larger blooms and more of them. Then, too, the soil is more mellow and easier to work. You can prepare it when convenient and let lay till plants arrive. Our Roses are dug when the season's growth has been completed and they are shipped to you at the proper time—October or November.

**ORDER EARLY.**—We fill orders in rotation in which received. If sold out of variety ordered, unless you specify otherwise, we will substitute a Rose as near like it as possible. We have many other varieties of Roses which we do not list because of insufficient quantities.

## Prevent Black-Spot Next Year Spray Rose-Beds This Fall

Black-spot lives over winter on diseased leaves that fell to the ground this summer. Help prevent the spread of the disease next spring by disinfecting the soil in and around the Rose-bed. Spray the plants, the ground and the surroundings with Lime-sulphur at the rate of 1 pound to 4 gallons of water. Apply it with a sprayer or a sprinkling can the last thing in the fall; it is also well to repeat this treatment the first thing in the spring.

1-lb. can 40c, postpaid. 8-lb. bag \$1.25, Express Collect.
